- **SOC & Threat Detection**: SIEM, EDR, IDS/IPS, suspicious activity monitoring
- **Incident Response**: forensic investigation, incident handling and remediation
- **Network Security**: security policies, configuration and administration of NGFW
- **Security Auditing & Compliance**: security assessments and compliance of IT systems and networks
- **PKI & Certificates**: management of Certificate Authorities
- **Threat Intelligence**: cybersecurity monitoring, threat analysis and vuln. tracking
- **Hardening & Access Control**: system hardening, access management and access rights
- **Offensive Security**: enumeration, vulnerability scanning, penetration testing, brute-force attacks

Networking

- **CCNA** level, with **CCNP** knowledge
- **IP Network Configuration & Administration**: network cabling and patching, routing, Wi-Fi, VLANs
- **Advanced Infrastructure Monitoring**: SNMP, MIB, OID, ICMP

Windows & Linux Systems

- **Advanced Windows & Linux Server Administration**: Active Directory, DHCP, DNS, web, file and print services, RDS, WSUS, databases, PKI, email systems, anti-spam, image deployment, thin and roaming profiles, GPO, SSH, etc.
- **IPBX Administration**: servers, desk phones, DECT, mobile devices (VoIP and SIP)
- Citrix Environment & Desktop Management
- **Automation**: PowerShell, Python, Batch, Bash

IT Support & Asset Management

- IT asset and ticket management, software licences, hardware, consumables and end-user support

Virtualisation, Backup & Cloud

- Installation and administration of virtualisation platforms
- Configuration and management of backup solutions, SAN and NAS
- Implementation of Business Continuity & Disaster Recovery BCP / DRP
- AWS Cloud Management IaaS, PaaS, SaaS

Project Management

- **Planning & Project Delivery**: organisation, budget, risk, timeline and deliverable management
- **Project Tools & Frameworks**: DAT, SMART, RACI, Gantt, PERT, WBS, OBS, PBS
- **Methodologies**: Agile, Scrum, Kanban, Spiral, Iterative, V-Model, DevOps
- **Coordination**: organisation and facilitation of project steering meetings, stakeholder coordination and action tracking
- **Documentation**: technical documentation and deliverable tracking

Software & tools

Network Analysis:
Wireshark - Nmap - Suricata - NtopNG - Specops Password Policy - PsLoggedOn - EvlWatcher - BloodHound

Offensive Security:
Metasploit - Burp Suite - Nessus - Yersinia

Firewalls:
PfSense – FortiGate - Nftables

SOC / Monitoring:
Wazuh - Nagios - PRTG - Centreon - Graylog - Rsyslog - NXLog

Network Equipment:
Cisco - Aruba - Netgear

Virtualisation:
Proxmox - VMware Esxi / vCenter/vSphere - Hyper-V - VDI / Citrix - Docker

Backup & Recovery:
Veeam - R-Drive Image - Bacula - SAN/NAS.

Cloud :
Azure - AWS (IaaS, PaaS, SaaS)

Other:
Proofpoint- Squid - GLPI - 3CX - HCL Notes - WireGuard - Domino - Apache2 - IIS - Samba - FOG - RustDesk
